GSS Symposium 2017 Program at a Glance

Inamori Foundation Memorial Hall

Message from GSS Program Coordinator and Unit Director

Welcome to the GSS Symposium 2017 at Inamori Foundation Memorial Hall, Kyoto University on October 6-7, 2017. Since this year is the last year of the GSS program under the support of the Ministry of Education, Culture, Sports, Science and Technology (MEXT), we set the symposium theme as “*Lessons Learned and Future Endeavors*” to review our GSS program activity and future prospect of the interdisciplinary graduate school education program. For this symposium we invite the GSS International/Industry Advisers as speakers to gain insights into emerging industrial perspectives for fostering human resources as future global leaders.

The Program has provided GSS students with five-years learning opportunities such as field training, internship, interdisciplinary seminars, international academic exchange, industry-university collaborative project and international cooperation project. We already have 11

students who completed this Program, and 75 students are currently with this GSS program. A wide variety of their educational backgrounds is a unique point of the GSS program, as they come from nine graduate schools and three research institutes of Kyoto University: Graduate Schools of Education, Economics, Medicine, Science, Engineering, Agriculture, Asia and Africa Area Studies (ASAFAS), Informatics, and Global Environmental Studies; and Research Institute for Sustainable Humanosphere (RISH), Disaster Prevention Research Institute (DPRI), and Center for Southeast Asian Studies (CSEAS).

We are looking forward to the constructive discussions on the symposium through different perspectives across disciplines. We appreciate all the cooperation provided for this symposium and GSS program by advisors, GSS professors and staffs, and the joining Graduate Schools and Research Institutes of Kyoto University.

Kaoru Takara
GSS Program Coordinator
(Professor of DPRI)
